DETAILED ACTION

Response to Amendment

Examiner acknowledges response by applicant's representative received 9/17/07. Examiner further acknowledges the clarifications made to address the issues of the previous action.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 & 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Alam (602) in view of Mankoff et al. (651).

Alam discloses Vocabulary Building Game Cards.

Regarding claims 1 & 3

Alam teaches a vocabulary building exercise using words (see abstract and claim 1), identifying a first expression (before) obscuring it (card face down) and presenting a lesser-known word to form a second expression (pre) and a means for scoring in the

form of a scoring system (col. 4, lines 63 - 67). Alam fails to explicitly teach providing one or more definitions of the lesser known word(s). Mankoff discloses Vocabulary Playing Cards. Mankoff teaches vocabulary building cards with words and definitions, which are used to decipher the vocabulary word (see abstract, claim 1 and col. 2, lines 29-68). It would have been obvious to modify Alam in view of Mankoff to provide multiple choices for the players.

Response to Arguments

Applicant's arguments filed 9/17/07 have been fully considered. A new office action on the merits is presented above.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure and are cited to show the state of art with respect to features of the claimed invention.
